## Application for LEAFY GREEN CROPS

**This recommendation is made as permitted under FIFRA and has not been submitted to or approved by the EPA or state lead pesticide agency.**

**READ AND FOLLOW THE ENTIRE LABEL BOOKLET FOR THIS PRODUCT BEFORE PROCEEDING WITH THE USE DIRECTIONS CONTAINED IN THIS LABELING.**

### DIRECTIONS FOR USE

This label must be in the possession of the user at the time of application.

ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS IN THE PRODUCT LABEL BOOKLET MUST BE FOLLOWED, INCLUDING STATEMENTS PERTAINING TO THE WORKER PROTECTION STANDARDS, ON THE REGISTERED LABEL.

Zayin can be applied to all crops via spray at a rate of 24-64 ounces per acre per application depending on the severity of the disease pressure. Zayin is designed to control multiple diseases listed on the main label, the rate shall be based on the level of outbreak with standard application of 22-32 ounces per acre and a wash of outbreak control level of 48-64 ounces per acre. Application should be made as close to onset of disease and continued every 7-14 days for superior control. Applications can be made anytime during season with enough water to provide through coverage. The use of a surfactant is suggested to increase the efficacy of Zayin. Zayin contains a 0 pre-harvest, 0 re-entry and has no minimum risk level issues for export. .

If Zayin Fungicide is being applied with Reckoning Fungicide reduce both materials by 1/2 rate as there is a synergistic effect from mixing the materials. In such a mix the rate for Zayin would be lowered to 11-16 fluid ounces per acre with Reckoning mix rate being the same 11-16 fluid ounces per acre. This application would be for standard IPM rational, if an outbreak has occurred and active mildew is seen increase the rate to 24 fluid ounce of Zayin and 24 fluid ounces of Reckoning. If Zayin will be applied with GroPros Wrath Insecticide apply Zayin at 11-16 fluid ounces per sprayed acre with Wrath kept at its 32 fluid ounces per acre rate.

### NOTICE
