Python* WDG

EPA Reg. No. 62719-277

2(ee) Recommendation[†]

Reduced Rates of Python WDG Plus Atrazine-Containing Pre-Mix Products for Preemergence Soil Applications to Field Corn

For Distribution and Use only in the State of Michigan

ATTENTION

[†]This recommendation is made as permitted under FIFRA 2(ee) and has not been submitted to or approved by the EPA or state lead pesticide agency.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read and follow all label precautions and limitations imposed by the label affixed to the container for this product.

Directions for Use

Reduced rates of Python* WDG can be tank mixed with labeled rates of atrazine-containing pre-mix products such as Bicep II, Bicep Lite II, Surpass 100, FulTime, Harness Extra, Guardsman, and Extrazine for improved control of certain broadleaf weeds not consistently controlled by atrazine pre-mix products. Reduced rates of Python tank-mixed with labeled rates of these atrazine pre-mix products will provide consistent preemergence control of velvetleaf, lambsquarters, pigweed species, waterhemp, and triazine "resistant" varieties (triazine tolerant biotypes) of these species.

On soils with less than 3% organic matter, tank-mix Python at 0.8 oz/A with a labeled rate of the atrazine pre-mix product. On soils with greater than 3% organic matter, tank-mix Python at 1.0 oz/A with a labeled rate of the atrazine pre-mix product.

Python WDG Plus Atrazine-Containing Pre-Mix Products Rate Structure

Soil Organic Matter	Python Rate/Acre	Atrazine Pre - Mix Product
< 3%	0.8 oz	labeled rate
≥ 3%	1.0 oz	labeled rate
