

FIFRA Section 24(c) Special Local Need (SLN) Label
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

Galigan® 2E

EPA Reg. No. 66222-28

SLN No. OR-190007

For Control of Broadleaf Weeds in Carrots Grown for Seed

This label is valid until December 31, 2029 or until otherwise amended, withdrawn, cancelled, or suspended.

ACTIVE INGREDIENT:	% BY WT.
Oxyfluorfen: 2-chloro-1- (3-ethoxy-4-nitrophenoxy)-4-(trifluoromethyl) benzene*	22.2%
OTHER INGREDIENTS	77.8%
TOTAL:	100.0%

Contains petroleum distillate

*Equivalent to 2 lbs active ingredient per gallon

KEEP OUT OF REACH OF CHILDREN
WARNING-AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
 (If you do not understand the label, find someone to explain it to you in detail.)

ENVIRONMENTAL HAZARDS

Follow all applicable directions, restrictions, and precautions in the Environmental Hazards section of the label affixed to the main container of Galigan 2E.

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This Section 24(c) Special Local Need (SLN) label and the label affixed to the main container of Galigan 2E must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the label affixed to the main container of Galigan 2E.

DOSAGE, TIMING AND METHOD OF APPLICATION

Galigan 2E is effective for postemergence control of certain broadleaf weeds in carrots grown for seed. Apply Galigan 2E by ground application only at 16-32 fluid ounces (0.25-0.50 lbs ai) per broadcast acre. A maximum of 32 fluid ounces product may be applied per acre per year. Apply in a minimum spray volume of 20 gallons of water per acre. Use conventional ground spray equipment at a minimum spray pressure of 20 psi and maximum spray pressure of 40 psi. Spray equipment should be calibrated carefully before each use.

Dormant Application: Make application after carrots are dormant and there is no active growth (between November 15 and February 28). Make application as a directed spray using drop nozzles between the rows and in the furrows. For best results, apply when weeds are in the 2 to 4 leaf stage. Do not make a broadcast application over the top of the carrots at this timing.

Spring Application: Begin applications in early spring. Make application as a broadcast spray when carrots are at least 8-10 inches tall. For best results, apply when weeds are in the 2 to 4 leaf stage.

Layby Application: Make application at layby with a directed spray using drop nozzles between the rows and in the furrows. For best results, apply when weeds are in the 2 to 4 leaf stage. Do not make a broadcast application over the top of the carrots at this timing.

SURFACTANT

When postemergence weed control is desired from Galigan 2E, add 2 to 4 pints of an 80% active nonionic surfactant cleared for application to growing crops per each 100 gallons of spray. The addition of 4 pints of an 80% active nonionic surfactant per 100 gallons of spray is recommended to enhance postemergence activity when hard water (greater than 600 ppm) is used as a carrier. Maintain agitation until spraying is completed.

CROP TOLERANCE

The application of Galigan 2E to carrots grown for seed has the potential to injure the crop. Injury to carrots grown for seed appears to be transient, and benefits in weed control outweigh any slight amount of crop injury. The potential for crop injury may be reduced by using the lower rate, by not applying soon after or in combination with linuron, and by applying to larger size carrot plants.

WEEDS SUPPRESSED AND/OR CONTROLLED

Galigan 2E will provide control of the following weeds when applied between the onset of germination and the four-leaf seedling growth stage:

COMMON NAME	SCIENTIFIC NAME
Common Groundsel	<i>Senecio vulgaris</i>
Mayweed Chamomile	<i>Anthemis cotula</i>
Prickly Lettuce	<i>Lactuca serriola</i>
Redroot pigweed	<i>Amaranthus retroflexus</i>
Hairy Nightshade	<i>Solanum sarachoides</i>

RESTRICTIONS

- Do not apply more than 32 fluid ounces of Galigan 2E (0.5 lb ai) per year.
- Do not apply more than 2 applications per year.
- For use on carrots grown for seed under this SLN, do not apply this product through any type of irrigation system.
- Do not apply by aerial application.

Special Crop Use Restrictions

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a non-feed/non-food use by the Oregon Department of Agriculture, and is regulated by Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use on Crops Grown For Seed. If the applicator of this pesticide is not the producer, the applicator must provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, must provide a copy of this pesticide label to the seed container.

This pesticide does not have an established pesticide residue tolerance for this crop. Consequently, no portion of this seed crop may be used or distributed for food or feed for 1 year (365 days) after the last application of this product. This restriction pertains to, but is not limited to: green chop, forage, hay, pellets, meal, whole seed, cracked seed, straw, roots, bulbs, foliage or seed screenings, and to the grazing of the crop field, stubble or regrowth. All seed screenings shall be disposed of in such a manner that the screenings cannot be distributed or used for food or feed purposes, as indicated in OAR 603-057- 0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.

Any seed from a field treated with this pesticide product shall bear specific and conspicuous container labeling, or if shipped in bulk, on the shipment invoice or bill of lading. The labeling shall contain the following statement:

“This seed was produced using one or more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form, may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, the Oregon Department of Agriculture and other regulatory agencies.”

ADAMA Special Conditions and Disclaimer For Use of Galigan 2E on Carrots Grown for Seed

ADAMA intends that this Section 24(c) label be distributed only by the Jefferson County Seed Growers Association only to end users and/or growers who agree in writing to the terms and conditions required by the Jefferson County Seed Growers Association, including a waiver and release from all liability and indemnification by the user and/or grower of ADAMA, Jefferson County Seed Growers Association and others for the failure to perform and crop damage from the use of Galigan 2E on carrots grown for seed. If such terms and conditions are unacceptable, return Galigan 2E at once unopened.

This product when used on carrots grown for seed may lead to crop injury, loss or damage. ADAMA recommends that the user and/or grower test this product in order to determine its suitability for such intended uses. The Jefferson County Seed Growers Association and ADAMA make this product available to the user and/or grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower, outweigh the extent of potential injury associated

with the use of this product. The decision to use or not to use the pesticide must be made by each individual Galigan 2E user and/or grower on the basis of possible crop injury from Galigan 2E, the severity of the weed infestation, the cost of alternative weed controls, and other factors. ADAMA intends that because of the risk of failure to perform or crop damage that all such use is at the user's and/or grower's risk. *These Special Conditions and Disclaimer For Use of Galigan 2E on Carrots Grown for Seed are required by ADAMA and not specified by the U.S. EPA or the State of Oregon.*

Read the “**LIMITATION OF WARRANTY AND LIABILITY**” in the label booklet for GALIGAN 2E before using.
