

FIFRA Section 24(c)
SPECIAL LOCAL NEED LABEL

**FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF
 WASHINGTON**

ASULOX® HERBICIDE

EPA Reg. No. 70506-139

EPA SLN No. WA-080001

This label for Asulox Herbicide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2027.

POSTEMERGENCE WEED CONTROL IN SPINACH GROWN FOR SEED

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the EPA registered label.

DIRECTIONS FOR USE

WEEDS	RATE/A	INSTRUCTIONS
Shepherdspurse Pigweed Prickly Lettuce Common Lambsquarters	1.5 to 3.0 pints	Use 1.5 pints per acre on spinach with 2-4 true leaves, or 3 pints per acre on spinach with 4-6 true leaves. Allow at least 7 days between applications. Some stunting of the spinach may occur, especially with 2 applications of 3 pints per acre. A nonionic surfactant may be added to the tank mix at the rate of 2 pints per 100 gallons (0.25% v/v) to increase efficacy. Spray adjuvants containing fertilizer, such as urea ammonium nitrate, are not recommended. Suggested dilution rate is 20 gallons of water per acre.

RESTRICTIONS/PRECAUTIONS

- Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.
- Do not make more than 2 applications of Asulox Herbicide per acre per year.
- Do not apply more than 6 pints of Asulox Herbicide per acre per year.
- Do not apply Asulox Herbicide through any type of irrigation system.

- This chemical is known to leach through soil into ground water under certain conditions as a result of agricultural use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in ground water contamination. Surface water contamination may occur in areas with poorly draining soils and little or no buffers or in areas where drainage systems flow directly to surface water.
- All spinach seed screenings shall be disposed of in such a way that they cannot be distributed or used for human food or animal feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the director immediately upon request. Conditioner disposal records shall consist of documentation of on-farm disposal, disposal at a controlled dumpsite, incinerator, composter or other equivalent disposal site and shall include the lot numbers, amount of material disposed of, the grower(s), and the date of disposal.
- No portion of the spinach seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes.
- Spinach seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.
- Spinach seed may not be distributed for human consumption or animal feed.

WSDA Container Disposal Guidance:

Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at <https://agr.wa.gov/wastepesticide>. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.
