Tordon* 101 Mixture

EPA Reg. No. 62719-5

Special 2(ee) Recommendation [†]

(For Distribution and Use Only in the State of New York)

Allowing for modified high volume leaf-stem treatments

ATTENTION

[†] This recommendation is made as permitted under FIFRA 2(ee) and has not been submitted to or approved by the EPA.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Tordon* 101 Mixture herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Except as described in this product bulletin, use of Tordon 101 Mixture is subject to all use precautions and limitations imposed by the label affixed to the product container.
- Tordon 101 Mixture is a restricted use pesticide.

Directions for Use

For modified high volume leaf-stem treatments of woody brush mix 2 to 4 quarts of Tordon* 101 Mixture herbicide in 100 gallons of water. To control a wider range of plant species, mix 2-4 quarts of Tordon 101 Mixture with 1-3 quarts of Garlon* 4 herbicide or 1 to 4 quarts of Garlon 3A herbicide and dilute to make 100 gallons of spray. Apply after the foliage is well developed and in a manner which thoroughly wets all leaves, stems, and root collars.

The amount of spray mixture applied per acre will vary with plant size and density. It is recommended that the total amount of spray mixture applied per acre is 40 to 60 gallons. However, total use of Tordon 101 Mixture must not exceed a maximum of 8 quarts per acre.
