

TECHNICAL BULLETIN

May 18, 2012

NUCOP 3L

EPA Reg. No. 42750-75

USE ON SPINACH

This bulletin is to advise growers and applicators that Albaugh has elected to remove spinach as a labeled use site from NUCOP 3L and is now transitioning to product labels without spinach as a listed crop.

In the interim, Albaugh recommends that current NUCOP 3L inventory not be used to treat spinach crops. Albaugh recommends that growers use alternate products to control diseases in spinach.

Please contact your local Albaugh representative if you have any questions.
