

**FOR DISTRIBUTION AND USE  
ONLY WITHIN THE STATE OF  
WASHINGTON**

**FIFRA SECTION 24(c) Special Local Need (SLN) Label  
For Suppression of Lygus Bugs in Carrots Grown for Seed only**

# **Orthene 97**

EPA REG. NO. 5481-8978

EPA SLN NO. WA-090021

## **CAUTION**

Harmful if swallowed

**This label for Orthene 97 expires and must not be distributed or used in accordance with this SLN registration after December 31, 2028.**

### **DIRECTIONS FOR USE**

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the EPA registered label.

Apply 1 lb. Orthene 97 per application per acre (0.97 lb a.i./A) in 10 to 60 gallons of spray mix by ground as a broadcast application or in 5 to 10 gallons of spray mix by air. Apply when eggs or insects first appear.

### **RESTRICTIONS / PRECAUTIONS**

- Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 24 hours.
- Do not feed crop residues to livestock or allow animals to graze treated areas.
- Do not apply to carrots grown for fresh market or processing.
- Do not apply more than 2 lb. Orthene 97 (1.94 lbs. a.i./A) per year.
- For repeat application, user must allow a minimum of 7 days between applications.
- Do not apply using low pressure handwand equipment.

- For use in accordance with this SLN label, **do not** apply this product through any type of irrigation system.
- This product and its degradate are highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are foraging the treatment area.
- FOR FOLIAR APPLICATIONS OF THIS PRODUCT TO A CROP WHERE BEES ARE UNDER CONTRACT TO POLLINATE THAT CROP: Foliar application of this product is prohibited to a crop from onset of flowering until flowering is complete when bees are under contract for pollination services to that crop unless the application is made to prevent or control a threat to public and/or animal health as determined by a state, tribal, authorized local health department or vector control agency.

#### **CROPS GROWN FOR SEED**

- All carrot seed screenings shall be disposed of in such a way that they cannot be distributed or used for food or feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the WSDA forthwith upon request. Disposal records shall consist of documentation from a controlled dumpsite, incinerator, or other equivalent disposal site and shall show the lot numbers, amount of material disposed of, its grower(s) and the date of disposal.
- No portion of the carrot seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings, may be used or distributed for food or feed purposes.
- Carrot seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.
- Carrot seed may not be distributed for human consumption or animal feed.

#### **WSDA CONTAINER DISPOSAL GUIDANCE:**

Completely empty the contents of the pesticide container into application equipment, and apply to a labeled crop or site. The empty container may be disposed of in a sanitary landfill. Burning is not a legal method of container disposal in Washington.
