**FOR CONTROL OF BROADLEAF WEEDS AND GRASSES IN FIELD CORN  
IN THE STATE OF MISSOURI**

#### **DIRECTIONS FOR USE**

This product bulletin serves as supplemental labeling for use of PREQUEL™ herbicide in Missouri. The following restrictions include specific requirements beyond those found under the "Restrictions For Use On Field Corn" section of the container label. Refer to the PREQUEL™ herbicide label and technical bulletins for full descriptions of use restrictions.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#### **ENVIRONMENTAL PRECAUTIONS**

Refer to the container label for additional use precautions and directions. Agricultural chemicals have the potential to move into shallow groundwater. The following restrictions have been developed to protect drinking water supplies.

Do not wash, load, or empty applications equipment near any well, as this practice is a potential source of ground water contamination. In fields having soils with less than 15% field moisture holding capacity, special care must be taken not to over-irrigate, since substantial over-irrigation promotes the leaching of chemicals.

**Do not use in the following counties in Missouri: Butler, Cape Girardeau, Dunklin, Mississippi, New Madrid, Pemiscot, Scott and Stoddard.**

#### **SOIL TYPE RESTRICTIONS**

If the water table is less than 25 feet below ground surface, do not apply to the following vulnerable loamy sand or sand soils. If the water table is unknown, do not apply PREQUEL™ herbicide to a restricted soil.

Alvin	Carr	Eustis	Malden	Scotco
Beulah	Clana	Finchford	Plainfield	Shelldrake
Bruno	Crevasse	Hodge	Sandbur	Sparta
Canalou	Diehlstadt	Landes	Sarpy	Wideman

If a field contains several soil types, one of which is a vulnerable soil listed above, and the water table is less than 25 feet, do not apply PREQUEL™ herbicide.
