Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- Use of this product according to this bulletin has not been reviewed or endorsed by the Office of the Indiana State Chemist.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

For control of turfgrass ants, apply Advion Insect Granular Bait at 0.38 to 4.61 lb product/1,000 square feet (equivalent to 0.61 to 7.36 oz per 100 square feet). When treating individual mounds uniformly apply the bait around the mound but avoid placing on top of the mound. Repeat applications after 7 days, if needed.

For optimal control, allow adequate time for ants to forage for the bait after application before mowing or using irrigation.

Follow all other use directions, restrictions, and precautions on the Advion Insect Granular Bait EPA-registered Section 3 label.
