KEEP OUT OF REACH OF CHILDREN

WARNING AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand this label, find someone to explain it to you in detail.)

Environmental Hazards

Follow all applicable directions, restrictions, and precautions in the Environmental Hazards section of the label affixed to the main container of Curzate 60DF.

Directions For Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This SLN label and the label affixed to the main container of Curzate 60DF must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the label affixed to the main container of Curzate 60 DF.
- Curzate® 60DF may be applied to control downy mildew in cabbage grown for seed, garden beet grown for seed, and Swiss chard grown for seed.

Use Instructions

- Apply Curzate 60DF at 3.2 ounces (0.12 pounds cymoxanil) per acre per application in sufficient water to obtain thorough spray coverage of the crop. For conventional ground application equipment, including tractor-mounted sprayers, boom or backpack sprayers, use a minimum of 20 gallons per acre.
- DO NOT use Curzate 60DF alone. Always tank-mix with a labeled rate of protectant fungicide. The protectant fungicide must have a different mode-of-action from Curzate 60DF (i.e., a non-Group 27 fungicide). Follow the more restrictive labeling of any tank mix partners. Do not tank mix with products that contain a prohibition on tank mixing.
- Applications can be made prior to or after transplanting.
- The first application should be made when local conditions indicate that downy mildew infection is imminent.
- Make applications on a 5-7 day interval as long as disease conditions exist.

- Do not exceed 5 applications of Curzate 60DF per 12-month period.
- Do not apply more than 1 pound of Curzate 60DF (0.6 pounds cymoxanil) per acre per 12-month period.
- For hard-to-wet foliage, a spray adjuvant may be used to help increase spray coverage and retention.

Restrictions:

- Do not apply by air.
- For use under this SLN label do not apply this product through any type of irrigation system.
- For use only on specified crops grown for seed.
- Potatoes, tomatoes, cucurbit crops, lettuce (head and leafy), peppers, spinach, hops, bulb crops and other crops in leafy greens subgroup 4A may be re-planted at any time after Curzate 60DF applications. All other crops cannot be planted until 30 days after Curzate 60DF application.

Special Crop Use Restrictions

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a nonfeed/non-food use by the Oregon Department of Agriculture, and is regulated by Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use On Crops Grown For Seed. If the applicator of this pesticide is not the producer, the applicator must provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, must provide a copy of this pesticide label to the seed conditioner.

This pesticide does not have an established pesticide residue tolerance for these crops. Consequently, no portion of these seed crops may be used or distributed for food or feed for 1 year (365 days) after the last application of this product. This restriction pertains to, but is not limited to: green chop, forage, hay, pellets, meal, whole seed, cracked seed, straw, roots, bulbs, foliage or seed screenings, and to the grazing of the crop field, stubble or regrowth. All seed screenings shall be disposed of in such a manner that the screenings cannot be distributed or used for food or feed purposes, as indicated in OAR 603-057-0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.

Any seed from a field treated with this pesticide product shall bear specific and conspicuous container labeling, or if shipped in bulk, on the shipment invoice or bill of lading. The labeling shall contain the following statement:

“This seed was produced using one or more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form, may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, the Oregon Department of Agriculture and other regulatory agencies.”
