Product: Divanem®
EPA Reg. No. 100-1611

Use: Addition of Bermudagrass Mite as a Pest Controlled on Golf Course Greens, Tees, and Fairways

Expire Date: December 31, 2027

- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For control of Bermudagrass mite (*Eriophyes* spp.) on golf course greens, tees, and fairways, apply Divanem at 3.125 to 6.25 fl oz/acre on a 14 day interval. Initiate applications prior to or in the early stages of symptom development. Tank mix with a surfactant or wetting agent and water in with 0.1 to 0.25 inch of irrigation immediately after application.

Maximum Annual Rate: 0.27 lb ai abamectin/calendar year (50 fl oz Divanem/A/calendar year).

Follow all other directions for use, restrictions and precautions on the Divanem Section 3 label.
