usted en detalle. (If you do not understand the label, find someone to explain
it to you in detail.)**

ENVIRONMENTAL HAZARDS

Follow all applicable directions, restrictions, and precautions in the Environmental Hazards section of the label affixed to the main container of Comite.

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This Special Local Need (SLN) label and the label affixed to the main container of Comite must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the label affixed to the main container of Comite.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

FIFRA Section 24(c)
SPECIAL LOCAL NEED LABEL

ALFALFA GROWN FOR SEED ONLY

Application Rate: 24 – 40 fl. oz./A (1.23-2.05 lb ai/A)

Ground Application: Apply in 25 to 40 gallons of water per acre.

Aerial Application: Apply in a minimum of 10 gallons of water per acre.

RESTRICTIONS: Observe a Restricted Entry Interval (REI) of 9 days. There is no exception allowed for hand weeding or thinning. Do not make more than two applications per year. Allow at least 14 days between applications.

CARROTS GROWN FOR SEED ONLY

Application Rate: 32 – 48 fl. oz./A (1.64 – 2.46 lb ai/A)

Ground Application: Apply in a minimum of 25 to 40 gallons of water per acre.

Aerial Application: Apply in a minimum of 10 gallons of water per acre.

Application Information: Start applications as soon as mites appear.

RESTRICTIONS: Observe a Restricted Entry Interval (REI) of 2 days. There is no exception allowed for hand weeding or thinning. Do not make more than two applications per year. Allow at least 14 days between applications. Hand harvesting is prohibited until 13 days after application.

CLOVER GROWN FOR SEED ONLY

Application Rate: 32 – 48 fl. oz./A (1.64 – 2.46 lb ai/A)

Ground Application: Apply in 25 to 40 gallons of water per acre.

Aerial Application: Apply in a minimum of 10 gallons of water per acre.

RESTRICTIONS: Observe a Restricted Entry Interval (REI) of 9 days. There is no exception allowed for hand weeding or thinning. Do not make more than two applications per year. Allow at least 14 days between applications.

SUGAR BEETS GROWN FOR SEED ONLY

Application Rate: 32 – 48 fl. oz./A (1.64 – 2.46 lb ai/A)

Ground Application: Apply in 25 to 40 gallons of water per acre.

Aerial Application: Apply in a minimum of 10 gallons of water per acre.

RESTRICTIONS: Observe a Restricted Entry Interval (REI) of 9 days. There is no exception allowed for hand weeding or thinning. Do not make more than two applications per year. Allow at least 14 days between applications.

RESTRICTIONS

- For use under this SLN, do not apply this product through any type of irrigation system.
- **WHEN SPRAYING IN THE VICINITY OF AQUATIC AREAS:** Do not apply by ground within 50 feet or by air within 75 feet of lakes, reservoirs, rivers, permanent streams, marshes, natural ponds, estuaries, or commercial fish farm ponds. This excludes irrigation canals and wasteways as well as man-made irrigation conveyance structures and impoundments, unless an exclusion contains water year-round. Risk of exposure to sensitive aquatic areas can be reduced by making applications when the wind direction is away from the aquatic area. Refer to the Spray Drift Precautions and Runoff Precautions sections of the label affixed to the main container of Comite for additional directions, restrictions, and precautions.

SPECIAL CROP USE RESTRICTIONS

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a non-feed/non-food use by the Oregon Department of Agriculture and is regulated by Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use on Crops Grown for Seed. If the applicator of this pesticide is not the producer, the applicator must provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, must provide a copy of this pesticide label to the seed conditioner.

FIFRA Section 24(c)
SPECIAL LOCAL NEED LABEL

This pesticide does not have an established pesticide residue tolerance for these crops. Consequently, no portion of these seed crops may be used or distributed for food or feed for 1 year (365 days) after the last application of this product. This restriction pertains to, but is not limited to: green chop, forage, hay, pellets, meal, whole seed, cracked seed, straw, roots, bulbs, foliage or seed screenings, and to the grazing of the crop field, stubble or regrowth. All seed screenings shall be disposed of in such a manner that the screenings cannot be distributed or used for food or feed purposes, as indicated in OAR 603-057-0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.

Any seed from a field treated with this pesticide product shall bear specific and conspicuous container labeling, or if shipped in bulk, on the shipment invoice or bill of lading. The labeling shall contain the following statement:

"This seed was produced using one or more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form, may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, the Oregon Department of Agriculture and other regulatory agencies."
