

Section 2(ee) Recommendation

Date: May 6, 2024

Product: Minecto® Pro
EPA Reg. No. 100-1592

Use: For Control of False Spider Mite (*Brevipalpus* sp.) in Citrus

State: FL

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

Minecto Pro will provide control of false spider mite (*Brevipalpus* sp.) in citrus when applied at the rate of 12 fl. oz/A. Apply when mites first appear.

To avoid illegal residues Minecto Pro must always be mixed with a non-phytotoxic, non-ionic activator type wetting, spreading, and/or penetrating spray adjuvant or horticultural oil (not a dormant oil) and applied as specified in the Citrus Crop Use Directions section of the Minecto Pro Section 3 label.

Thorough coverage is essential to obtain best results. Select a spray volume and spray pressure for the size of the trees and density of the foliage to ensure thorough spray coverage.

Apply this product diluted in a minimum volume of 30 gal/A by ground application. Under conditions such as high pest populations, dense foliage, or adverse application conditions (such as high temperatures), use a greater volume of water to ensure adequate coverage.

Do not apply by air for control of false spider mites (*Brevipalpus* sp.).
