Success[®]

EPA Reg. No. 62719-292

Special 2(ee) Recommendation[†]

(For Distribution and Use in the States of Arizona, California, Hawaii, Idaho, Maine, Nevada, New Hampshire, Oregon, Utah, and Washington)

Control of Spotted Wing Drosophila on Various Crops

ATTENTION

[†]This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Success[®] insecticide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Success according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Success.

Directions for Use

Refer to product label for Success for Use Precautions, Mixing, and Application directions. This recommendation must be in the possession of the user at the time of application.

Success can be used as part of an integrated program to manage spotted wing drosophila. This use is limited to foliar ground application.

Apply Success to the crops listed below for control of spotted wing drosophila. Use a higher rate in the rate range for moderate to severe infestations and/or larger plant volume. Begin applications at first signs of adult activity. Due to the occurrence of multiple generations in a growing season, repeated applications may be required. Follow resistance management recommendations on the product label.

Consult your Dow AgroSciences representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area. Refer to specific crop sections of the product label for additional information and restrictions.

Crop	Success (fl oz/acre)
caneberries (subgroup 13A)	4 – 6
grape	4 - 8
pome fruits (crop group 11)	4 – 10
stone fruits (crop group 12)	4 - 8
