

LABEL ADVISORY FOR ALBAUGH DICAMBA PRODUCTS

(UPDATED January 12, 2018)

DICAMBA DMA

EPA Reg. No. 42750-40

DICAMBA HD

EPA Reg. No. 42750-209

IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE ANY APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE.

The above referenced Albaugh dicamba products are NOT approved for application to dicamba-tolerant GMOs, including cotton and soybeans.

DO NOT APPLY DICAMBA HERBICIDES TO ANY DICAMBA-TOLERANT GMO CROP IN 2018 UNLESS you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application.

The US EPA and certain states have adopted additional restrictions on the use of dicamba and other auxin class herbicides (such as 2,4-D) that may not be on the EPA-approved label. These requirements may affect all dicamba products regardless of whether such products are labeled for in-crop use on dicamba-tolerant GMO crops. Such restrictions and requirements may include:

- Timing of application
- Weather conditions (wind speed, temperature)
- Application equipment (boom height, nozzle selection, pressure)
- Permitted uses
- Extended buffer zones
- Applicator certification and training requirements
- Notification and recordkeeping requirements

For more information, before applying dicamba growers and applicators should consult <https://www.epa.gov/ingredients-used-pesticide-products/registration-dicamba-use-genetically-engineered-crops>, and contact the U.S. EPA, your state pesticide regulatory agency, and/or your university Extension Service to identify the requirements applicable to their intended use of dicamba.

ALWAYS READ AND FOLLOW LABEL DIRECTIONS.
