Directions for Use

This Section 24(c) Special Local Needs label permits the use of ProFume® gas fumigant on non-edible commodities and use of quarantine/regulatory treatment schedules. Follow all use directions, requirements and precautions on this SLN label, the federally registered label attached to the product container, and the ProFume Applicator's Manual.

ProFume may be used for treatment of commodities that are not part of the food chain for human consumption such as:

- forest and plant products, such as logs, lumber, firewood, wood packaging materials, dunnage, wood chips, mulch, paper products, bamboo, wicker, dried vines, plants and flowers for ornamental use
- processed and unprocessed cotton, wool, burlap, other fibers or cloth
- feathers, processed and unprocessed human and animal hair
- leather products, animal hides, fur
- soil-contaminated non-food cargo, such as wood construction debris

ProFume may be used for quarantine/regulatory purposes as specified by a regulatory authority, such as local, state, federal, or international government agency or regulatory authority, for treatment of raw agricultural commodities, processed commodities, and non-food and/or non-feed commodities. Follow requirements for dosage rates, treatment periods, monitoring, and other procedures specified by the state or federal agency responsible for the treatment schedule. Douglas Products and Packaging Company assumes no risk or liability for loss or damage from fumigations performed for quarantine/regulatory purposes. **Important:** For treatment of raw agricultural commodities and processed commodities, the applicator must follow all of the directions and restrictions on the cylinder label and in the Applicator's Manual for ProFume.

When ProFume is used for quarantine/regulatory purposes according to a treatment schedule for sulfuryl fluoride specified by a regulatory authority, the following are applicable:

- The Fumiguide™ program for ProFume is not required for dosage calculation.
- The maximum concentration of ProFume can exceed 128 oz/1000 cu ft if required by the treatment schedule.
- The maximum target dosage can exceed 1500 oz-h/1000 cu ft if required by the treatment schedule for fumigation of non-food or non-feed commodities, empty structures/vessels, or commodities and processed food/feed items that will not enter the human food chain.

Follow all requirements for dosage rates, treatment periods, monitoring and other procedures specified by the regulatory authority responsible for the treatment schedule.
