

Technical Information Bulletin for Use of Endura Fungicide as a Tank-mix with thiophanate-methyl fungicide in Snap Beans to Control White Mold and Gray Mold in South Carolina

EPA Reg. No. 7969-197

This recommendation is made as permitted under FIFRA section 2 (ee) and has not been submitted to or approved by the EPA.

All applicable directions, restrictions, precautions and Conditions of Sale and Warranty on the EPA registered label are to be followed. Refer to the container label for additional instructions. Always read and follow label directions.

Information contained in this Technical Information Bulletin is not intended to replace or amend any product labeling. Always read and follow all label directions when using any pesticide alone or in tank mix combinations.

The user must have this recommendation in their possession at the time of use.

This recommendation is for the use of Endura fungicide as a tank-mix with thiophanate-methyl fungicide in snap beans to control white mold (*Sclerotinia sclerotiorum*) and gray mold (*Botrytis cinerea*)

Directions for Use

For the control of white mold and gray mold, apply **Endura** at 5 oz tank-mixed with a thiophanate-methyl fungicide product at rates **equivalent to 0.7 to 1.05 lb/Acre of active ingredient** (including but not limited to: T-Methyl 4.5F AG fungicide at 20-30 oz/A or T-Methyl 70W WSB at 1-1.5 lb/A or Thiophanate Methyl 85 WDG at 0.8-1.2 lbs/A or Topsin® 4.5FL liquid flowable fungicide at 20-30 oz/A).

Begin applications of **Endura** tank-mixes with thiophanate-methyl prior to disease development and/or at 10% bloom and continue on a 7- to 10-day interval. Use shorter interval when disease pressure is high.

Make a maximum of two **Endura** applications per season.

Do not apply within 14 days of harvest.
