RecruitTM IV

EPA Reg. No. 62719-453

Requirements for Baited Sentricon[®] Stations Installed at New Structures

(For Distribution and Use Only in the State of Florida)

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label booklet accompanying the container for RecruitTM IV before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Recruit IV according to this supplemental labeling is subject to all use precautions and limitations imposed by the label booklet for Recruit IV.

In Florida, the Sentricon System may be installed for protection of new structures in lieu of a preconstruction termiticide treatment. During the year following installation of the Sentricon System, each Sentricon station initially baited with Recruit IV must have at least one auxiliary Sentricon station, baited with Recruit IV, installed within 12 inches if suitable ground access exists. Additional auxiliary stations may contain monitoring devices and/or Recruit IV. Thereafter, auxiliary Sentricon stations may be used as specified in the "Monitoring" and "Installation of Auxiliary Stations" sections of the label booklet for Recruit IV.
