EPA Reg. No. 33906-9-81880

TANK MIXED WITH PURSUIT¹ HERBICIDE FOR CONTROL OF VOLUNTEER CORN AND SHATTERCANE IN SOYBEANS

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Targa is recommended for control of volunteer corn and shattercane when tank mixed with "Pursuit" Herbicide in Area 1 as defined on the Targa label.

Do not apply this tank mix through any type of irrigation system.

HOW TO USE

Targa, at the rate of 5 to 7 ounces per acre, may be tank mixed with "Pursuit" for the control of volunteer corn and shattercane only. Use the 7 ounce rate when shattercane and com approach the upper size limit and/or weed pressure is heavy. Refer to the "Pursuit" label for "Pursuit" rates, broadleaf weeds and other grass species controlled.

For best results, apply when volunteer corn or shattercane are in the size ranges listed below. Applications to weeds smaller than, or exceeding the stated sizes for application may result in less than satisfactory control.

SIZE AT APPLICATION (Inches)

Volunteer corn 6 to 18 Shattercane 6 to 12

Note: Tank mixes of Targa with "Pursuit" have shown some reductions in grass control when compared to either product applied alone. This tank mix is labeled for the control of volunteer corn and shattercane only. Different control measures should be used to control other grasses present. Best results are obtained when Targa is applied 24 hours before, or 7 days after the application of "Pursuit". Do not apply Targa to plants stressed from a previous herbicide application.

Do not include any other pesticide in with the tank mix of Targa plus "Pursuit".

APPLICATION INFORMATION

Targa plus "Pursuit" tank mixes may be applied by ground or by air. Use a minimum of 10 gallons of water when applying by ground or a minimum of 5 gallons of water when applying by air. Do not apply in a band application. Consult the respective labels for pressure and spray drift statements. The most restrictive statement in either case will apply.

Applications of Targa + "Pursuit" must include either: 1. A nonionic surfactant at the rate (concentration) of 0.25% v/v (1 quart per 100 gallons of spray solution). Use only EPA approved surfactants authorized for use on food crops containing at least 80% active ingredients.

2. Crop oil concentrate at a rate (concentration) of 1.0%v/v (4 quarts per 100 gallons of spray solution).

IMPORTANT

BEFORE USING TARGA, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
