Fontelis®

EPA Reg. No. 352-834

Special 2(ee) Recommendation[†]

(For Distribution and Use in the states of Alabama, Florida, Georgia, Kentucky, North Carolina, South Carolina, Tennessee, and Virginia)

For Control of Glomerella Leaf Spot and Bitter Rot (Colletotrichum fructicola) in Apples

Refer to product label for Fontelis for general use precautions, mixing directions, application directions, and restrictions.

ATTENTION

[†]This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Fontelis® fungicide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Fontelis according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Fontelis fungicide.

Directions for Use

Apples Glomerella leaf spot Bitter rot (Colletotrichum fructicola) 20 fl oz	Begin applications prior to disease development and continue on a 7- to 10-day interval. Use higher rate and shorter interval when disease pressure is high.
---	--

NOTE: Do NOT tank-mix Fontelis[®] with thinning agents.

Make no more than 2 sequential applications of Fontelis® before switching to a fungicide with a different mode of action. Consider mixing with an EBDC fungicide for resistance management. Minimum time from application to harvest (PHI) is 28 days. Do not exceed 61 fl oz (0.80 lb active ingredient)/acre per year.
