Container label

GROUP HERBICIDE

FBN BROMOXYNIL 240 EC

HERBICIDE

Emulsifiable Concentrate

CONTAINS BROMOXYNIL

For use in WHEAT (Spring and Winter), BARLEY, OATS, FLAX (including low linolenic acid varieties), CORN, FALL RYE, CANARY GRASS (for seed production), TRITICALE, GARLIC, ONION (dry bulb only), SEEDLING ALFALFA, ESTABLISHED ALFALFA (for seed production only), and SEEDLING GRASSES, FORAGE AND GRAIN SORGHUM, FIELD CORN, FORAGE MILLET, GRAIN PEARL MILLET and ZERO TILL

AGRICULTURAL

ACTIVE INGREDIENT: BROMOXYNIL (present as the octanoate ester) 240 g/L

REGISTRATION NO. 35241 PEST CONTROL PRODUCTS ACT

EYE IRRITANT

READ THE LABEL AND ATTACHED BOOKLET BEFORE USING

NET CONTENTS: 1 LITRE -BULK

For Emergency Medical Assistance (Human or Animal) contact Rocky Mountain Poison Control at 1-866-767-5041.

For Chemical Emergency Assistance (Spill, Leak, Fire or Accident) contact CHEMTREC at 1-800-424-9300 (North America) or 1-703-527-3887 (International).

Farmer's Business Network Canada, Inc.

PO Box 5607 High River, AB T1V 1M7 1-844-200-FARM (3276)

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. Causes eye irritation, **DO NOT** get in eyes. Avoid contact with skin and clothing. Harmful or fatal if swallowed. Store the container tightly closed away from seeds, fertilizer, plants and foodstuffs. Wash concentrate from skin or eyes immediately.

Avoid breathing spray mist. After use wash hands and other exposed skin. Avoid spray drift onto crops other than those recommended.

CROP	POST-APPLICATIONACTIVITY REI			
For all crops, except	DO NOTenter or allow worker entry into treated areas during the			
sweet corn and garlic	restricted-entry interval (REI) of 24hours.			
	Irrigation, handset 5 days			
Sweet Corn	Harvest, hand 20 days			
	All other activities 24 hours			
Garlic	Irrigation, handset 2 days			
	All other activities 24 hours			

Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. DO NOT reuse them. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Apply only to agricultural crops when the potential for drift to areas of human habitation or areas of human activity such as houses, cottages, schools, and recreational areas is minimal. Take into consideration wind speed, wind direction, temperature inversions, application equipment, and sprayer settings.

Ground or Aerial application: Wear coveralls over a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes, and goggles or face-shield during mixing, loading, clean-up and repair. Wear a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes during application. Gloves are not required during application within a closed cab/cockpit.

Do not allow the pilot to mix chemicals to be loaded onto the aircraft. Loading of premixed chemicals with a closed system is permitted.

It is desirable that the pilot have communication capabilities at each treatment site at the time of application.

All personnel on the job site must wash hands and face thoroughly before eating and drinking. Protective clothing, aircraft cockpit and vehicle cabs must be decontaminated regularly. Avoid contamination of ponds, streams, rivers and other water sources.

Approved English Label Sub. No. 2024-3366 2025-01-16

Pre-harvest grazing intervals (wheat, barley, oats, forage sorghum, forage millet and seedling alfalfa): Do not use treated crops for grazing of livestock or green feed until 30 days after application of FBN BROMOXYNIL 240 EC unless otherwise stated on the label. Donot cut treated crops for forage until 30 days after application of FBN BROMOXYNIL 240 EC.

CAUTION: Do not graze other treated crops or cut for feed unless specified above; sufficient data are not available to support such use.

ENVIRONMENTAL PRECAUTIONS:

This product contains an active ingredient and aromatic petroleum distillates, which are toxic to aquatic organisms. Observe spray buffer zones specified under DIRECTIONS FOR USE.

TOXIC to non-target terrestrial plants. Observe spray buffer zones specified under DIRECTIONS FOR USE.

To reduce runoff from treated areas into aquatic habitats avoid application to areas with a moderate to steep slope, compacted soil, or clay.

Avoid application when heavy rain is forecast.

Contamination of aquatic areas as a result of runoff may be reduced by including a vegetative filter strip between the treated area and the edge of the water body.

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

Take the container label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

This product contains petroleum distillates. Vomiting may cause aspiration pneumonia.

STORAGE:

Store this product away from food or feed. **Store the container tightly closed away from seeds, fertilizer and plants.** This FBN BROMOXYNIL 240 EC formulation will solidify at temperatures below -20°C but will become useable again at temperatures above 0°C. Insecticides and fungicides should be segregated from herbicides so as to prevent the possibility of cross-contamination.

SHAKE WELL BEFORE USING.

DISPOSAL:

Recyclable containers

Do not reuse this container for any purpose. This is a recyclable container, and is to be disposed of at a container collection site. Contact your local distributor/dealer or municipality for the location of the nearest collection site. Before taking the container to the collection site:

- 1. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank.
- 2. Make the empty, rinsed container unsuitable for further use.

If there is no container collection site in your area, dispose of the container in accordance with provincial/territorial requirements.

Approved English Label Sub. No. 2024-3366 2025-01-16

Returnable containers

DO NOT reuse this container for any purpose. For disposal, this empty container may be returned to the point of purchase (distributor/dealer).

Refillable containers

For disposal, this container may be returned to the point of purchase (distributor/dealer). It must be refilled by the distributor/dealer with the same product. Do not reuse this container for any other purpose.

DISPOSAL OF UNUSED, UNWANTED PRODUCT:

For information on disposal of unused, unwanted product, contact the manufacturer or the provincial/territorial regulatory agency. Contact the manufacturer and the provincial/territorial regulatory agencyin case of a spill, and for cleanup of spills.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label.

Approved English Label Sub. No. 2024-3366 2025-01-16

PO Box 5607 High River, AB T1V 1M7 1-844-200-FARM (3276)

DIRECTIONS FOR USE:

As this product is not registered for the control of pests in aquatic systems, DO NOT use to control aquatic pests.

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

Timing: For best results spray when weeds are in the seedling stage. Apply in good growing conditions. Application **must** be made before the crop shields the weeds.

Sprayer: Wash the tank and clean all filters, screens and tips. Select nozzle tips to apply the recommended volume of water per hectare. Flood jet type tips are not recommended. Adjust boom height to ensure uniform coverage of weeds. For ground application, spray at 5–10 km/h. Ensure that all tips are in good condition and spraying the same volume.

Mixing: Half fill the tank with clean water. Add the required amount of FBN BROMOXYNIL 240EC and agitate thoroughly. Fill the tank and agitate again before use.

<u>Field sprayer application:</u> DO NOT apply during periods of dead calm. Avoid application of this product when winds are gusty. DO NOT apply with spray droplets smaller than the American Society of Agricultural Engineers (ASAE S572.1) medium classification. Boom height must be 60 cm or less above the crop or ground.

AERIAL APPLICATION (wheat and barley only):

<u>Aerial application:</u> DO NOT apply during periods of dead calm. Avoid application of this product when winds are gusty. DO NOT apply when wind speed is greater than 16 km/h at flying height at the site of application. DO NOT apply with spray droplets smaller than the American Society of Agricultural Engineers (ASAE S572.1) medium classification. Reduce drift caused by turbulent wingtip vortices. Nozzle distribution along the spray boom length MUST NOT exceed 65% of the wing- or rotorspan.

Apply only by fixed-wing or rotary aircraft equipment, which has been functionally and operationally calibrated for the atmospheric conditions of the area and the application rate and conditions of this label.

Label rates, conditions and precautions are product specific. Read and understand the entire label before opening this product. Apply only at the rate recommended for aerial application on this label. Where no rate for aerial application appears for the specific use, this product cannot be applied by any type of aerial equipment.

Ensure uniform application. To avoid streaked, uneven or overlapped application, use appropriate marking devices.

Approved English Label Sub. No. 2024-3366 2025-01-16

Use Precautions: Apply only when meteorological conditions at the treatment site allow for complete and even crop coverage. Apply only under conditions of good practice specific to aerial application as outlined in the National Aerial Pesticide Application Manual, developed by the Federal/Provincial/Territorial Committee on Pest Management and Pesticides.

This product may be tank mixed with registered pest control products, whose labels also allow tank mixing, provided the entirety of both labels, including Directions For Use, Precautions, Restrictions, Environmental Precautions, and Spray Buffer Zones are followed for each product. In cases where these requirements differ between the tank mix partner labels, the most restrictive label must be followed. Do not tank mix products containing the same active ingredient unless specifically listed on this label.

In some cases, tank mixing pest control products can result in reduced pesticide efficacy or increased host crop injury. The user should contact Farmer's Business Network Canada, Inc. at 1-844-200-FARM (3276) for information before applying any tank mix that is not specifically recommended on this label.

Product Specific Precautions: Read and understand the entire label before opening this product. If you have questions, call Farmer's Business Network Canada, Inc. representatives at 1-844-200-FARM (3276) or obtain technical advice from the distributor or your provincial agricultural representative.

Application of this specific product must meet and/or conform to the following:

Volume: FBN BROMOXYNIL 240 EC plus either MCPA or 2,4-D must be applied in volume rates of not *less than* 20 L/ha. For best results when there is a heavy crop canopy, or when the majority of the weeds are cow cockle, green or pale smartweed, hemp-nettle, redroot pigweed or Canada thistle, a volume rate of 40 L/ha is recommended.

Spray Buffer Zones:

A spray buffer zone is NOT required for:

- uses with hand-held application equipment permitted on this label,
- low-clearance hooded or shielded sprayers that prevent spray contact with crop, fruit or foliage,
- soil drench or soil incorporation.

The spray buffer zones specified in the table below are required between the point of direct application and the closest downwind edge of sensitive terrestrial habitats (such as grasslands, forested areas, shelter belts, woodlots, hedgerows, riparian areas and shrublands), sensitive freshwater habitats (such as lakes, rivers, sloughs, ponds, prairie potholes, creeks, marshes, streams, reservoirs and wetlands) and estuarine/marine habitats.

	Crop		Spray Buffer	Zones (met	es) Required	for the Prote	ection of:
Method of Application			Freshwater Habitat of Depths:				Terrestrial Habitat
			Less than 1 m	Greater than 1 m	Less than 1 m	Greater than 1 m	
Field sprayer	All crops		1	1	1	1	1
Aerial	Barley	Fixed wing	20	5	1	1	55
	and wheat	Rotary wing	20	3	1	_1	45

When tank mixes are permitted, consult the labels of the tank mix partners and observe the largest (most restrictive) spray buffer zone of the products involved in the tank mixture and apply using the coarsest spray (ASAE) category indicated on the labels for those tank mix partners.

The spray buffer zones for this product can be modified based on weather conditions and spray equipment configuration by accessing the Spray Buffer Zone Calculator on the Pesticides portion of the Canada.ca website.

HERBICIDE RESISTANCE MANAGEMENT:

For resistance management, FBN BROMOXYNIL 240 EC is a Group 6 herbicide. Any weed population may contain or develop plants naturally resistant to FBN BROMOXYNIL 240 EC and other Group 6 herbicides. The resistant biotypes may dominate the weed population if these herbicides are used repeatedly in the same field. Other resistance mechanisms that are not linked to site of action, but specific for individual chemicals, such as enhanced metabolism,may also exist. Appropriate resistance management strategies should be followed.

To delay herbicide resistance:

- Where possible, rotate the use of FBN BROMOXYNIL 240 EC or other Group 6 herbicides with different herbicide groups that control the same weeds in a field.
- Use tank mixtures with herbicides from a different group when such use is permitted. To delay resistance, the less resistance-prone partner should control the target weed(s) as effectively as the more resistance-prone partner.
- Herbicide use should be based on an integrated weed management program that includes scouting, historical information related to herbicide use and crop rotation, and considers tillage (or other mechanical control methods), cultural (for example, higher crop seeding rates; precision fertilizer application method and timing to favour the crop and not the weeds), biological (weed-competitive crops or varieties) and other management practices.
- Monitor weed populations after herbicide application for signs of resistance development (for example, only one weed species on the herbicide label not controlled). If resistance is suspected, prevent weed seed production in the affected area if possible by an alternative herbicide from a different group. Prevent movement of resistant weed seeds to other fields by cleaning harvesting and tillage equipment when moving between fields, and planting clean seed.
- Have suspected resistant weed seeds tested by a qualified laboratory to confirm resistance and identify alternative herbicide options.
- Contact your local extension specialist or certified crop advisors for any additional pesticide resistance management and/or integrated weed management recommendations for specific crops and weed biotypes.

For further information or to report suspected resistance, contact Farmer's Business Network Canada, Inc. representatives at 1-844-200-FARM (3276).

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. Causes eye irritation, **DO NOT** get in eyes. Avoid contact with skin and clothing. Harmful or fatal if swallowed. Store the container tightly closed away from seeds, fertilizer, plants and foodstuffs. Wash concentrate from skin or eyes immediately.

Avoid breathing spray mist. After use wash hands and other exposed skin. Avoid spray drift onto crops other than those recommended.

CROP	POST-APPLICATIONACTIVITY	REI
For all crops, except	DO NOT enter or allow worker entry into treated	areas during the
sweet corn and garlic	restricted-entry interval (REI) of 24 hours.	

CROP	POST-APPLICATIONACTIVITY	REI
	Irrigation, handset	5 days
Sweet Corn	Harvest, hand	20 days
	All other activities	24 hours
Garlic	Irrigation, handset	2 days
	All other activities	24 hours

Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. DO NOT reuse them. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Apply only to agricultural crops when the potential for drift to areas of human habitation or areas of human activity such as houses, cottages, schools, and recreational areas is minimal. Take into consideration wind speed, wind direction, temperature inversions, application equipment, and sprayer settings.

Ground or Aerial application: Wear coveralls over a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes, and goggles or face-shield during mixing, loading, clean-up and repair. Wear a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes during application. Gloves are not required during application within a closed cab/cockpit.

Do not allow the pilot to mix chemicals to be loaded onto the aircraft. Loading of premixed chemicals with a closed system is permitted.

It is desirable that the pilot have communication capabilities at each treatment site at the time of application.

All personnel on the job site must wash hands and face thoroughly before eating and drinking. Protective clothing, aircraft cockpit and vehicle cabs must be decontaminated regularly.

Pre-harvest grazing intervals:

- For wheat, barley, oats, forage sorghum, forage millet and seedling alfalfa: **DO NOT** use treated crops for grazing of livestock or green feed until 30 days after application of FBN BROMOXYNIL 240 EC unless otherwise stated on the label. **DO NOT** cut treated crops for forage until 30 days after application of FBN BROMOXYNIL 240 EC.
- For other labelled crops, **DO NOT** graze the treated crops or cut for feed.

ENVIRONMENTAL PRECAUTIONS:

This product contains an active ingredient and aromatic petroleum distillates, which are toxic to aquatic organisms. Observe spray buffer zones specified under DIRECTIONS FOR USE.

Approved English Label Sub. No. 2024-3366 2025-01-16

TOXIC to non-target terrestrial plants. Observe spray buffer zones specified under DIRECTIONS FOR USE.

To reduce runoff from treated areas into aquatic habitats avoid application to areas with a moderate to steep slope, compacted soil, or clay.

Avoid application when heavy rain is forecast.

Contamination of aquatic areas as a result of runoff may be reduced by including a vegetative filter strip between the treated area and the edge of the water body.

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

Take the container label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

This product contains petroleum distillates. Vomiting may cause aspiration pneumonia.

STORAGE:

Store this product away from food or feed. Store the container tightly closed away from seeds, fertilizer and plants.

This FBN BROMOXYNIL 240 EC formulation will solidify at temperatures below -20°C but will become useable again at temperatures above 0°C. Insecticides and fungicides should be segregated from herbicides so as to prevent the possibility of crosscontamination.

SHAKE WELL BEFORE USING.

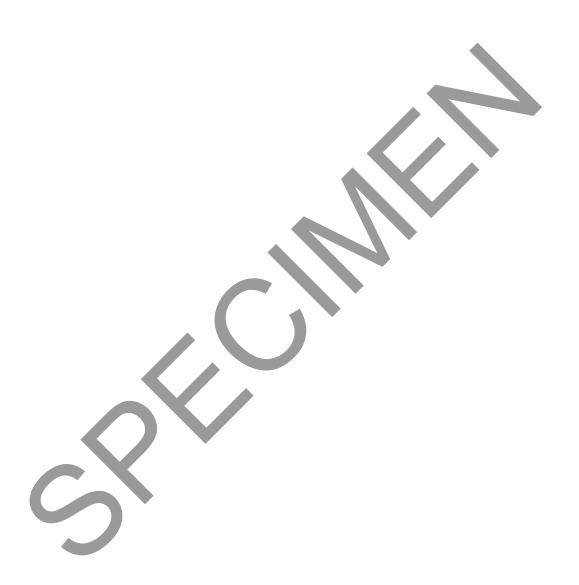

DISPOSAL:

Recyclable containers

Do not reuse this container for any purpose. This is a recyclable container, and is to be

Approved English Label Sub. No. 2024-3366 2025-01-16

disposed of at a container collection site. Contact your local distributor/dealer or municipality for the location of the nearest collection site. Before taking the container to the collection site:

- 1. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank.
- 2. Make the empty, rinsed container unsuitable for further use.

If there is no container collection site in your area, dispose of the container in accordance with provincial/territorial requirements.

Returnable containers

DO NOT reuse this container for any purpose. For disposal, this empty container may be returned to the point of purchase (distributor/dealer).

Refillable containers

For disposal, this container may be returned to the point of purchase (distributor/dealer). It must be refilled by the distributor/dealer with the same product. Do not reuse this container for any other purpose.

DISPOSAL OF UNUSED, UNWANTED PRODUCT:

For information on disposal of unused, unwanted product, contact the manufacturer or the provincial/territorial regulatory agency. Contact the manufacturer and the provincial/territorial regulatory agencyin case of a spill, and for cleanup of spills.

WHEAT (spring, durum and winter - not underseeded to legumes)

	Spray volume and	Timing	Application rate
	pressure		
FBN BROMOXYNIL 240 EC used alone	ļi.	Spring wheat may be treated from the 2-leaf until the early flag leaf stage. Winter wheat may be treated from the 2- to 4-leaf stage in the fall or from the time growth begins to the early flag leaf stage in the spring.	1.2–1.4 L/ha. (The 9.7 L container treats 7.1 - 8.3 ha). If weeds are beyond the leaf stages indicated on under adverse growing conditions, use of the higher recommended ratewill improve control.
FBN BROMOXYNIL 240 EC + MCPA	Apply in 50– 100 L water per hectare at apressure of 275 kPa.	time growth begins to the early flag leaf stage in the spring.	Spring wheat: FBN BROMOXYNIL 240 EC at 1.2 L/ha tank mixed with 275–550 g active ingredient MCPA per hectare where indicated. Winter wheat: FBN BROMOXYNIL 240 EC at 1.2 L/ha can be tank mixed with 275 g active ingredient MCPA per hectare. Refer to table at end of booklet for correct volume of MCPA. (The 9.7 L container of FBN BROMOXYNIL 240 EC treats 8.3 ha). Note: Refer to the MCPA label for precautions and limitations. Add MCPA to the spray tank first, agitate, then add FBN BROMOXYNIL 240 EC.
FBN BROMOXYNIL 240 EC + 2,4-D	Apply in 100 L water per hectare at a pressure of 275 kPa.	Spring and winter wheat may be treated from the 4-leaf until the early flag leaf stage. Application before the 4-leaf stage may injure the crop.	FBN BROMOXYNIL 240 EC at 1.2 L/ha tank mixed with 275 - 420 g active ingredient 2,4-D per hectare. Refer to the table at end of booklet for correct volume of 2,4-D. (The 9.7 L container of FBN BROMOXYNIL 240 EC treats 8.3 ha) Note: 2,4-D ester is preferred although other formulations may be used. Add 2,4-D to the spray tank first, agitate and then add FBN BROMOXYNIL 240 EC. Refer to the 2,4-D label for precautions and limitations.

	WEEDS CONTROLLED
FBN BROMOXYNIL 240 EC used alone	Seedlings up to 4-leaf stage: Green smartweed, pale smartweed, lady's-thumb, wild mustard*, kochia**, cow cockle*, Russian thistle**, stinkweed*, cocklebur, common ragweed, pigweed*, velvetleaf***, bluebur, American nightshade.
	Seedlings up to 8-leaf stage: Wild buckwheat, Tartary buckwheat, common buckwheat, common groundsel, lamb's-quarters.
	* In normal conditions will be controlled up to the 4-leaf stage. Plants beyond this stage are unlikely to be controlled. The higher rate generally gives better results. ** Spray before plants are 5 cm high. *** Spray before plants are 8 cm high.
FBN BROMOXYNIL 240 EC + MCPA	As listed for FBN BROMOXYNIL 240 EC used alone plus these additional weeds: Seedlings up to 4-leaf stage: Redroot pigweed, flixweed, shepherd's purse, scentless chamomile*, volunteer sunflower, volunteer rapeseed/ canola**, hemp-nettle***, night flowering catchfly, Canada thistle****, perennial sow-thistle****, ball mustard. Seedlings up to 8-leaf stage: Stinkweed, common ragweed, wild mustard, wormseed mustard. * Spring annuals only. Will not control overwintered weeds. ** For high infestations tank mix 550 g active ingredient MCPA per ha. *** Tank mix 550 g active ingredient MCPA per ha. Plants beyond the 4-leaf stage are not likely to be controlled. Plants emerging after application, which is often the case on peat-type soils, will not be controlled. **** Top growth control.
FBN BROMOXYNIL 240 EC + 2,4-D	As listed for FBN BROMOXYNIL 240 EC used alone plus these additional weeds: Seedlings up to 4-leaf stage: Redroot pigweed, night flowering catchfly, flixweed*, shepherd's purse, volunteer sunflower, ball mustard. Seedlings up to 8-leaf stage: Stinkweed*, wild mustard. * The higher rate of 2,4-D is recommended for larger overwintered weeds (fall rosettes).

BARLEY (not underseeded to legumes)

	Spray	Timing	Application rate
	volume and		
	pressure		
FBN BROMOXYNIL 240 EC used alone	hectare at a	until the early flag leaf stage.	1.2–1.4 L/ha. (The 9.7 L container of FBN BROMOXYNIL 240 EC treats 7.1–8.3 ha). If weeds are beyond the leaf stages indicated or under adverse growing conditions, use of the higher recommended rate will improve control.
FBN BROMOXYNIL 240 EC + MCPA	hectare at a	treated from the 2-leaf until the early flag leaf stage.	FBN BROMOXYNIL 240 EC at 1.2 L/ha tank mixed with 275–550 g active ingredient MCPA per hectare where indicated. Refer to the table at end of booklet for correct volumeof MCPA. (The 9.7 L container of FBN BROMOXYNIL 240 EC treats 8.3 ha). Note: Refer to the MCPA label for precautions and limitations. Add MCPA to the spray tank first, agitate, then add FBN BROMOXYNIL 240 EC.
FBN BROMOXYNIL 240 EC + 2,4-D	hectare at a pressure of 275 kPa.	treated from the 4-leaf until the early flag leaf stage. Application before the 4-leaf stage may result in injury to the crop.	FBN BROMOXYNIL 240 EC at 1.2 L/ha tank mixed with 275–420 g active ingredient 2,4- D per hectare. Refer to table at end of booklet for correct volume of 2,4-D. (The 9.7L container of FBN BROMOXYNIL 240 EC treats 8.3 ha). Note: 2,4-D ester is preferred although other formulations may be used. Add 2,4-D to the spray tank first, agitate and then add FBN BROMOXYNIL 240 EC. Refer to the 2,4-D label for precautions and limitations.

WEEDS CONTROLLED **FBN** Seedlings up to 4-leaf stage: BROMOXYNIL Green smartweed, pale smartweed, lady's-thumb, wild mustard*, kochia**, cow cockle*, 240 EC used Russian thistle**, stinkweed*, cocklebur, common ragweed, pigweed*, velvetleaf***, alone bluebur, American nightshade. Seedlings up to 8-leaf stage: Wild buckwheat, Tartary buckwheat, common buckwheat, common groundsel, lamb'squarters. * In normal conditions, will be controlled up to the 4-leaf stage. Plants beyond this stage are unlikely to be controlled. The higher rate generally gives better results. ** Spray before plants are 5 cm high. *** Spray before plants are 8 cm high. FBN As listed for FBN BROMOXYNIL 240 EC used alone plus these additional weeds: BROMOXYNIL 240 EC + MCPA Seedlings up to 4-leaf stage: Redroot pigweed, flixweed, shepherd's purse, scentless chamomile*, volunteer sunflower, volunteer rapeseed/canola**, hemp-nettle***, night flowering catchfly, Canada thistle****, perennial sow-thistle****, ball mustard. Seedlings up to 8-leaf stage: Stinkweed, common ragweed, wild mustard, wormseed mustard. * Spring annuals only. Will not control overwintered weeds. ** For high infestations tank mix 550 g active ingredient MCPA per ha. *** Tank mix 550 g active ingredient MCPA per ha. Plants beyond the 4-leaf stage are not likely to be controlled. Plants emerging after application, which is often the case on peat-type soils, will not be controlled. **** Top growth control. FBN As listed for FBN BROMOXYNIL 240 EC used alone plus these additional weeds: BROMOXYNIL 240 EC + 2,4-D Seedlings up to 4-leaf stage: Redroot pigweed, night flowering catchfly, flixweed*, shepherd's purse, volunteer sunflower, ball mustard. Seedlings up to 8-leaf stage: Stinkweed*, wild mustard.

* The higher rate of 2,4-D is recommended for larger over wintered weeds (fall rosettes).

FBN BROMOXYNIL 240 EC + ULTIM HERBICIDE + NON-IONIC

SURFACTANT: EASTERN CANADA AND MANITOBA

DIRECTIONS FOR USE: FIELD CORN ONLY

FBN BROMOXYNIL 240 EC may be tank mixed with Ultim Herbicide to control annual grasses, quackgrass and many broadleaf weeds. Tank mix 33.3 g/ha of Ultim Herbicide and 1.2 L/ha of FBN BROMOXYNIL 240 EC with a non-ionic surfactant at 0.2% v/v (2 L/1000 L).

Refer to the Ultim Herbicide label for additional information on Environmental Conditions and Biological Activity.

MIXING: Fill the tank about ½ full with clean water. Turn on full agitation. Add the required amount of Ultim Herbicide and agitate thoroughly until water soluble bags are completely dissolved and product is fully dispersed. Add the required amount of FBN BROMOXYNIL 240 EC, followed by a recommended non-ionic surfactant while agitating. Fill the remainder of the spray tank. Refer to the Ultim Herbicide label for further limitations and precautionson mixing instructions and sprayer cleanup.

Refer to the GLYPHOSATE label for the appropriate glyphosate use rate, precautions, mixing instructions and other use

# Seedlings up to 4-leaf stage:

Green smartweed, pale smartweed, lady's-thumb, wild mustard*, kochia**, cow cockle*, Russian thistle**, stinkweed*, cocklebur, common ragweed, pigweed*, velvetleaf***, bluebur, American nightshade.

# Seedlings up to 8-leaf stage:

Wild buckwheat, Tartary buckwheat, common buckwheat, common groundsel, lamb's-quarters.

# Grassy weeds up to 15 cm:

Wild oats, volunteer cereals, green foxtail.

^{*} In normal conditions, will be controlled up to the 4-leaf stage. Plants beyond this stage are unlikely to be controlled.

^{**} Spray before plants are 5 cm high.

^{***} Spray before plants are 8 cm high.

# SEEDLING GRASSES (not underseeded to legumes)

	Spray volume and	Timing	Application rate
	pressure		
FBN BROMOXYNIL 240 EC used alone	Apply in 150 L water per hectare at a pressure of 275 kPa. <b>DO NOT APPLY BY AIR.</b>	treated from the 2- to 4-leaf stage.	1.2–1.4 L/ha. (The 9.7 L container treats 7.1 - 8.3 ha). If weeds are beyond the leaf stage indicated or under adverse growing conditions, use of the higher recommended rate will improve control.  Note: Grasses grown for seed production in the year of establishment only.  Crops: Brome grass, crested wheatgrass, intermediate wheat grass, slender wheat grass, tall wheat grass, Russian wild rye, timothy, orchard grass, creeping red fescue, meadow fescue, reed canary grass.
FBN BROMOXYNIL 240 EC + MCPA	Apply in 150 L water per hectare at a pressure of 275 kPa. DO NOT APPLY BY AIR.	treated from the 2- to 4-leaf stage.	FBN BROMOXYNIL 240 EC at 1.2 L/ha tank mixed with 275 g active ingredient MCPA per hectare. Refer to the table at end of book for correct volume of MCPA. (The 9.7 L container of FBN BROMOXYNIL 240 EC treats 8.3 ha).  Note: MCPA ester is preferred although other formulations may be used. Add MCPA to the spray tank first, agitate, then add FBN BROMOXYNIL 240 EC. Refer to the MCPA label for precautions and limitations.

# NOTICE TO USER: READ THE FOLLOWING BEFORE USING THIS PRODUCT FOR THE INDICATED SPECIAL USE APPLICATIONS:

The DIRECTIONS FOR USE for the uses described in this section of the label were developed by persons other than Farmer's Business Network Canada, Inc. (FBN) under the User Requested Minor Use Label Expansion program. For these uses, FBN has not fully assessed performance (efficacy) and/or crop tolerance (phytotoxicity) under all environmental conditions or for all crop varieties when used in accordance with the label. The user should test the product on a small area first, under local conditions and using standard practices, to confirm the product is suitable for widespread application.
