TECHNICAL INFORMATION BULLETIN

Restricted Use Pesticide. Due to toxicity to aquatic invertebrate animals. For retail sale to and use only by Certified Applicators, or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification.

GROUP 15 INSECTICIDE

EPA Reg. No. 400-461

FIFRA Section 2(ee) Recommendation

This recommendation is made as permitted by Section 2(ee) of FIFRA and has not been submitted to or approved by the U.S. Environmental Protection Agency

FOR USE AND DISTRIBUTION IN THE STATE OF CALIFORNIA ONLY.

The addition of TADPOLE SHRIMP control in RICE.

Insect Growth Regulator

Not for Homeowner/Residential Use

DIRECTIONS FOR USE

Use information in accordance with Section 2(ee) of FIFRA.

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read and follow all applicable directions for use, restrictions, worker protection standard requirements, and precautions on the EPA registered main label attached to the container of **DIMILIN® 2L Insecticide (EPA Reg. No. 400-461).**

011218V071CA2ee

Crop	Pest	Application Rate (fl oz/acre)	Application Timing
RICE	Tadpole Shrimp	4 - 8	Apply DIMILIN 2L at 4 - 8 fluid ounces per acre to water when tadpole shrimp first hatch and are present, which is early post-flood or 2 to 10 days after the field is flooded. Use higher rate on heavy infestations and fields which take longer than four days to flood
	Consult your local extension service or UC IPM online for determination of economic threshold. DIMILIN 2L will prevent tadpole shrimp from successfully molting. DIMILIN 2L does not appear to control adult tadpole shrimp. DIMILIN 2L may have a transovarial effect on adult females causing them to produce unviable eggs. Apply DIMILIN 2L by air using at least 5 gallons total volume per acre. Do not apply DIMILIN 2L if flooding is in progress. Activity will be reduced. Since DIMILIN 2L is water active, the entire field must be treated. For maximum activity of DIMILIN 2L, do not disturb flood after a single application for at least 7 days. In water seeded, pinpoint or continuous flood rice, flood must not be disturbed for a minimum of 4 days following the first treatment. Hold treated water at least 14 days to allow for dissipation of DIMILIN 2L. DIMILIN 2L is not phytotoxic to rice. DIMILIN 2L can be safely applied in combination with post-permanent flood herbicides such as FACET®, GRANDSTAND® and LONDAX®. However, before using a tank-mix combination, read each product label carefully and follow Precautionary Statements on each label.
