ADMIRE® PRO Systemic Protectant

For basal tree applications to suppress the transmission of Huanglongbing disease(citrus greening) by Asian Citrus Psyllid in young citrus groves and replants.

EPA Reg. No. 264-827 SLN No. FL-120008

24(c) Special Local Need

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF FLORIDA

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

THIS LABEL IS VALID UNTIL DECEMBER 31, 2026 UNLESS OTHERWISE AMENDED, WITHDRAWN, CANCELED, OR SUSPENDED.

Active Ingredient:Imidacloprid,1-[(6-Chloro-3-pyridinyl)methyl]-*N*-nitro-2-imidazolidinimine 42.8% OTHER INGREDIENTS (Inerts): 57.2%

Contains 4.6 pounds of active ingredient per gallon.

DIRECTIONS FOR USE

Make applications on an individual tree basis; the size appropriate dose rate is to be applied as a soil drench using a metered dose directed to the soil adjacent to the trunk. Make applications in a volume not to exceed 32 ounces of diluted spray solution per tree (8-12 ounces is recommended). To ensure efficacy, the application site around the base of the tree, should be as weed-free as possible.

To prevent or delay the development of resistance, an effective foliar-applied product from an alternative mode of action grouping must be applied following a soil application of ADMIRE PRO Systemic Protectant and prior to a subsequent soil application of this and/or other Group 4A products

CITRUS

Crops of Crop Group 10 Including: Calamondin, Citrus citron, Citrus hybrids (includes chironja, tangelo, and tangor), Grapefruit, Kumquat, Lemon, Lime, Mandarin (tangerine), Pummelo, Orange (sweet and sour), Satsuma mandarin, White sapote (*Casimiroa* spp), and other cultivars and/or hybrids of these.

Disease to be suppressed	Rate of product per acre per application
Huanglongbing disease transmission by Asian Citrus Psyllid	7-14 fl. oz. /acre

Rate Chart Based on Tree Height

Tree Size	Imidacloprid Rate/Tree	Application Restrictions
New plantings or resets, less than 3 feet tall	0.025 fl. oz./tree 0.00090 lb a.i./tree	Allow a minimum of 6 weeks between applications
One to two year old trees, 3 to 5 feet tall	0.050 fl. oz./tree 0.0018 lb. a.i. / tree	Allow a minimum of 6 weeks between applications
Three to five year old trees, 5 to 9 feet tall	0.1 fl. oz./tree ¹ 0.0036 lb. a.i./tree	 Allow a minimum of 8 weeks between applications Do not exceed 2 applications per tree per 12 months Do not apply this product between November 1st and the completion of petal-fall the following year.

¹ Two applications at this per tree rate will support 140 treated-trees per acre

Do not exceed 14.0 fl. oz. product (0.5 lb. a.i. imidacloprid) per acre per application, regardless of tree size, tree count per acre or application method.

Do not apply more than 28.0 fl. oz. of ADMIRE PRO Systemic Protectant or exceed 1.0 lb. a.i. imidacloprid per acre per 12 months regardless of tree size, tree count per acre, application method or product brand utilized.

Environmental Hazards

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area. Fall soil drench treatment of 3-5 year old citrus trees may pose risks to honey bees that forage in the trees during the winter/spring bloom. Applicators are advised to help mitigate such risks by cooperating with the Florida Department of Agriculture and Consumer Services in its efforts to communicate hive location/placement options with local beekeepers. For further information, see FloridaBeeProtection.org.
