

TECHNICAL INFORMATION BULLETIN FOR THE USE OF Venerate XC® BIOINSECTICIDE San Jose scale on Almonds, Stone Fruit, and Pome Fruit

FIFRA Section 2(ee) Recommendation

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the U. S. Environmental Protection Agency.

FOR USE IN ALL STATES WHERE CROP AND PEST(S) EXIST AND WHERE 2(EE) RECOMMENDATIONS ARE RECOGNIZED.

Venerate XC®

EPA Reg. No. 84059-14

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Applications are to be made in a minimum of 75 gallons of water per acre using spray equipment designed to achieve full coverage of foliage and fruit in orchard crops. The use of a non-penetrating spreader-sticker may be used to improve coverage and rain fastness.

Crop	Target Insect	Application Method	Product Use Rate per Application	Application Instructions
Almonds and Stone Fruit	San Jose scale	Foliar (Ground) Applications from dormant to tight cluster targeting the adult stage Foliar (Ground) Applications targeting the	4 quarts per acre 1-2 quarts per acre	Apply during dormancy through tight cluster growth stages to target adult scales. Venerate XC can be combined with dormant oil sprays or oilbased adjuvants. Applications should target the crawler stage according to degree day models or by field scouting. For optimal performance, two applications at a 7-10 day interval are
		immature crawler stage		recommended for each generation.
Pome Fruit and		Foliar (Ground) Applications)	2 quarts per acre	Applications should target the crawler stage of San Jose scale according to degree day models or by field scouting. For
Stone Fruit		,	33.3	optimal performance, two applications at a 7-10 day interval are recommended for each summer generation.

Venerate XC * has a **pre-harvest interval (PHI)** of **0 days**.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 hours.

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and carefully observe the cautionary statements plus all the other information appearing on the product label.

This recommendation must be in the possession of the user at the time of pesticide application.
