Elevore®

EPA Reg. No. 62719-718

2(ee) Recommendation

Tank Mixes of Elevore® Plus 2,4-D Herbicide for Control of Cutleaf Eveningprimrose Control

---

ATTENTION

†**This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.**
- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Elevore® herbicide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Elevore according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Elevore.

Refer to the label affixed to the container for Elevore for general information, general use precautions and restrictions, mixing instructions, spray drift management, application instructions and resistance management.

Elevore may be tank mixed with 0.5 to 1 lb ae/acre of a labelled 2,4-D product to control cutleaf eveningprimrose. A glyphosate product labelled for this timing and intended crop may also be included for broad-spectrum control of emerged weeds. Tank mixing or using Elevore with any other product not specifically and expressly authorized by the label shall be the exclusive risk of the user, applicator and/or application advisor. When tank mixing, follow all label directions, including application rates, adjuvants, rotational crop restrictions, use precautions and limitations on each respective label.

All applicable directions, restrictions and precautions on the EPA registered label are to be followed. This labeling must be in the possession of the user at the time of pesticide application.
