

CITRI-CHE® MANGANESE 5%

GUARANTEED ANALYSIS

Sulfur (S)	2.9%
Manganese (Mn)	5.0%
5% Chelated Manganese (Mn)	

Derived from: Manganese Sulfate (Citric Acid as chelating agent)

Store above 32°F

KEEP OUT OF REACH OF CHILDREN

DANGER

Causes severe skin burns and eye damage-

PRECAUTIONARY STATEMENTS

Do not breathe dust, fume, gas, mist, vapors and spray. Wash face, hands and any exposed skin thoroughly after handling. Wear protective gloves, protective clothing, eye protection, face protection, and hearing protection.

FIRST AID

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. Wash contaminated clothing before reuse.

IF INHALED: Remove person to fresh air and keep comfortable for breathing.

IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

Immediately call a POISON CENTER or doctor.

In case of medical emergency, call toll free 1-877-424-7452

GENERAL INFORMATION

CITRI-CHE Manganese 5% chelated micronutrient contains 5% of fully chelated manganese in a form readily available to plants. It is recommended for use as an additive in liquid fertilizer and can also be used as a foliar spray. CITRI-CHE Manganese 5% is compatible with herbicides, insecticides and most agricultural chemicals that may be utilized in combination with liquid fertilizer. CITRI-CHE Manganese 5% is most effective when placed in the root zone during planting or moved into the soil by irrigation, tillage or rainfall. It is important that the manganese deficiency be treated before visual symptoms appear to ensure proper yields. Rates of application will vary depending upon the severity of the deficiency, climate, soil conditions, and method of application. Consult your State Agricultural Experiment Station, Extension Specialists or Winfield representative for advice in selecting treatments from this label to best fit local conditions or if your crop is not listed below.

DIRECTIONS FOR USE

Soil Application: CITRI-CHE Manganese 5% can be applied alone or in combination with liquid fertilizer for pre-plant, starter or side dress applications. For most effective treatment of row crops make soil applications in a band at planting time or as a side dressing shortly after planting.

UNITED**

Foliar Application: CITRI-CHE Manganese 5% diluted with water according to label recommendations can be applied as a foliar spray. To ensure even distribution on the leaf surfaces and increase the effectiveness of foliar application a small amount of wetting agent or detergent may be added.

This product is for use on all food and fiber crops. Crops: including alfalfa, almonds, apples, barley, beans, berries, broccoli, cabbage, cauliflower, carrots, celery, citrus, corn, hops, grapes, lentils, lettuce, milo, mint, onions, peas, peaches, peppers, prunes, potatoes, rapeseed, sorghum, soybeans, sugarbeets, sweet corn, strawberries, tomatoes, wheat, and cotton.

SOIL APPLICATION

Deficiency Level	Rate Banded	Rate Broadcast
Mild	1-2 qt/acre	1-3 qt/acre
Moderate	2-3 qt/acre	3-5 qt/acre
Severe	3-4 qt/acre	5-8 qt/acre

FOLIAR APPLICATION

Dilute 1/2 to 1 gallon of product in 100 gallons of water and spray to thoroughly cover foliage.

APPLICATION WITH IRRIGATION WATER

PIVOT, SPRINKLER, OVERHEAD AND SOLID SET IRRIGATION: Apply within 2 weeks of planting and before flowering using 1 to 4 quarts per acre or the dosage rates and timing recommended by your State Agricultural Experiment Station, Extension Specialists or Winfield Regional Plant Nutrition Specialist. This product may be mixed with most liquid fertilizers or pesticides before injection. Use a back-flow check valve to prevent material from back siphoning into water system.

MIXING INSTRUCTIONS

Add 1/3-1/2 of the liquid fertilizer to mix tank. Add correct amount of CITRI-CHE Manganese 5%. Add remainder of fertilizer, then mix thoroughly with strong agitation. Other chemicals, if used, should be added after the fertilizer-micronutrient mix has been prepared.

If there are questions regarding compatibilities of other substances with CITRI-CHE Manganese 5%, conduct a jar pilot test to determine the mixing characteristics of the different materials.

NOTE

A number of variables influence the rate of application necessary to control or correct a specific deficiency. For best results follow good agronomic practices, soil test and, if necessary, use tissue analysis.
