

**FIFRA §2(ee) RECOMMENDATION
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF FLORIDA**

TREFLAN® HFP HERBICIDE

EPA Reg. No. 10163-363

**For control of additional weeds
and additional methods of application in sugarcane**

- This recommendation must be in the possession of the user at the time of pesticide application.
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions and precautions on the EPA registered label are to be followed.
- This recommendation is made as permitted under FIFRA §2(ee) and has not been submitted to or approved by the EPA.

SUGARCANE

Postplant Application for Control of Most Annual Grasses, Including Guinea grass

Surface apply Treflan HFP after planting (for plant cane) or after harvesting (for ratoon cane). For best results in plant cane, the soil surface should be smooth and finely tilled. Apply Treflan HFP as soon as possible after tillage and planting before germination and emergence of grass weeds. For optimum efficacy in ratoon cane, minimize surface residue from previous crop before applying. Apply Treflan HFP just before anticipated rainfall in non-irrigated and furrow-irrigated sugarcane. Apply 1/2 inch or more irrigation in drip-irrigated or sprinkler-irrigated sugarcane as soon as possible after applying Treflan HFP.

Broadcast Application Rates per Acre

Soil Texture	Treflan HFP (pints)
all textures	6.0 – 8.0

Applications Up to Layby for Plant Cane or Ratoon Cane

Apply and incorporate Treflan HFP in spring from shortly before or after cane emergence until layby. Apply after beds have been shaved or false shaved. Loosen rain-packed beds 2 to 3 inches deep before application. Avoid incorporation equipment damage to seed pieces or emerging shoots. Incorporate with a rolling cultivator or bed chopper for all soil textures. Set rolling cultivator to cut 2 to 4 inches deep and operate at 6 to 8 mph. Set bed chopper to cut 3 to 4 inches deep and operate 4 to 6 mph. Two incorporation passes are necessary.

Broadcast Application Rates per Acre

Soil Texture	Treflan HFP (pints)
all textures	2.0 – 4.0 ¹

¹ Application rate within rate range may be adjusted according to weed pressure.

Itchgrass (Raoulgrass) Control

Apply and incorporate Treflan HFP on plant or ratoon cane.

Follow use directions in preceding section for layby application.
