CAUTION

KEEP OUT OF REACH OF CHILDREN

May cause eye irritation. Harmful if swallowed or absorbed through skin. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Do not get in eyes or on clothing. Avoid contact with skin, eyes or clothing. Wear protective eyewear (goggles, face shield, or safety glasses). Wash with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before use. For more details regarding the safe use/handling, storage, and disposal of this product as well as additional hazards and first aid measures, please obtain the current Safety Data Sheet at www.seipasa.com.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Store the product in its original container, tightly closed, in a cool and dry place. Store the containers between 40 and 95 °F (5°C and 35 °C) in a dry and well-ventilated place, away from sources of heat and direct sunlight. Keep out of reach of children. Store away from incompatible materials.

Disposal: If empty: Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

WARRANTY STATEMENT

Read the entire Directions for Use, Conditions of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following conditions, Disclaimer of Warranties and Limitations of Liability.

SEIPASA S.A. warrants that this product conforms to its description and is reasonably fit for the purposes stated on the label when used in accordance with directions for use. Buyers and users of this product assume the risk of any use contrary to such directions.

Timing and method of application, weather, watering practices, nature of soil, the disease problem, condition of the crop, incompatibility with other influencing factors in the use of this product are beyond the control of the seller. To the extent consistent with applicable law, the Seller's liability for any breach of warranty shall not exceed the purchase price of the material as to which a claim is made. To the extent consistent with applicable law, Buyers and users of this product are responsible for all loss or damage from use or handling of this product which results from conditions beyond the control of Seller, or without the fault or negligence of the Seller, or from failure to follow the label.

PURPOSE

Sweetsei™ is a product that, due to its formulation, represents a fundamental tool for the correct development of crops. Its use is recommended in the development and ripening of fruits.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>.

DIRECTIONS FOR USE

GENERAL USE INSTRUCTIONS:

Sweetsei™ is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by crops or other intended plants.

Can be used on all indoor and outdoor crops.

Sweetsei™ may be applied directly to the soil or to the foliage of growing crops.

Multiple application methods: as a soil drench, foliar application, in hydroponics, and in other fertilizing systems.

For soil applications, it is advisable to add the product to the fertigation system at the end of irrigation cycles to prevent excessive dilution or washing away. This ensures proper distribution to the entire root zone or wet bulb area. Following any fertigation application, it is essential to thoroughly flush the irrigation system.

SUGGESTED USES:

Suitable for use in fruiting vegetables and small fruits, citrus and tropical crops, stone fruit and pome fruit, as well as nuts, grapevines and table grapes and olive orchards.

Ensure a minimum separation of 7-14 days between applications.

	RECOMMENDATIONS
FOLIAR APPLICATION RATES	Apply 2 to 3 pints per acre for vegetables and 2 to 4 pints per acre for tree fruit, orchard, vineyard or grove.
SOIL APPLICATION RATES	Apply between 2 and 4 pints per acre.
GREENHOUSE, HYDROPONIC & SUBSTRATE	25 oz flz/100 gal and 50 oz fl/100gal.

FERTILIZER RECOMMENDATION:

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content and texture), weather conditions, time of year, general crop health and crop species. For best results, follow soil or plant tissue test recommendation to monitor specific levels of nutrients and maintain these levels for optimum plant growth.

Do not mix with highly acidic and/or highly alkaline reacting products. Compatible with most fertilizers and pesticides provided they are used in accordance with the registered label directions. However, various uncontrollable factors may affect its usage, such as different crop species and varieties, mixing preparations, application methods, weather conditions, and crop phenological stages. Therefore, it is always advisable to conduct a test prior to applying to the crop.

SHAKE CONTAINER WELL BEFORE USE.
